

Sales Performance Dashboard

Interactive Business Intelligence Dashboard using Power BI

Developed By: Rahul Chougule

Objective:

Transform raw business data into actionable insights using interactive dashboards and analytics.

Business Problem

Businesses often struggle to monitor performance because sales, products, customers, shipping, and regional data are distributed across multiple reports.

This creates challenges in:

- Tracking overall sales performance
- Identifying top and underperforming products
- Monitoring regional profitability
- Understanding customer purchasing behavior
- Controlling shipping costs

Manual reporting slows decision-making and reduces visibility.

Executive Summary

Purpose:

Provide a centralized overview of business performance.

Key Insights:

- Monitor Total Sales, Profit, Orders and Margin
- Analyze monthly sales trends
- Compare region performance
- Evaluate category contribution
- Understand customer segments

Regional Performance Analysis

Purpose:

Analyze regional sales and profitability.

Key Insights:

- Compare sales and profit across regions
- Analyze returns and order trends
- Monitor regional performance
- Geographic sales analysis
- Identify top-performing regions

Product Performance Analysis

Purpose:

Identify top and underperforming products.

Key Insights:

- Top-selling products
- Category sales distribution
- Product profitability analysis
- Category contribution tracking
- Product performance comparison

Customer & Shipping Performance Analysis

Purpose:

Understand customer behavior and shipping efficiency.

Key Insights:

- Customer segmentation analysis
- Shipping cost monitoring
- Customer purchasing trends
- Sales per customer analysis
- Shipping performance evaluation

Power BI Features Implemented

- ✓ Power Query
- ✓ Data Cleaning
- ✓ Data Modeling
- ✓ DAX Measures
- ✓ KPI Cards
- ✓ Custom Tooltips
- ✓ Drill-through Navigation
- ✓ Bookmarks
- ✓ Dynamic Filters
- ✓ Interactive Navigation
- ✓ Treemap
- ✓ Maps
- ✓ Dark Dashboard UI
- ✓ Multi-page Reporting

Business Solution

Developed an interactive multi-page Power BI dashboard to convert raw business data into meaningful insights.

The dashboard enables:

- Centralized KPI monitoring
- Faster decision-making
- Interactive analysis
- Performance tracking
- Improved reporting experience

Business Outcome

- Reduced manual reporting effort
- Improved business visibility
- Faster performance analysis
- Enabled data-driven decision-making
- Improved operational efficiency

Technology Stack
